Work Experience

RECUR Forever Inc

recur.com

Sept. 2021 - May 2023

Senior Front-end Engineer

Shipped digital collectible experiences for some of the most popular intellectual property in the world, including Nickelodeon, Hello Kitty, and Star Trek.

Front-end lead for the platform's "Challenges" system, allowing the user to trade in their digital collectibles for various rewards. This opened up gamification and utility on the platform.

Built a slots machine game for Slotomaina, the world's #1 free slots game. Players could assemble digital collectibles using a slot machine interface and trade in using the "Challenges" system.

Led development of the platform's design system, working closely with designers to create components that can be easily re-themed for different branded experiences.

Worked on the platform's "Cash Out" system, which enables customers to withdraw their money from the platform via wire transfers.

Madwire LLC

madwire.com

Oct. 2009 - Sept. 2021

Senior/Lead Front-end Engineer

As the 1st employee hired at Madwire, I have seen a startup company grow to over 550 employees. I'm no stranger to a fast paced work environment and have worn many hats during my career.

I have built several hundreds of different websites and templates throughout my career, implementing a wide variety of designs.

Experience with many different CMS and eCommerce platforms, such as Wordpress, BigCommerce, and Shopify.

Lead Front-end Engineer for Madwire's flagship marketing software, Marketing 360. Led a team of 4 other front-end developers.
